

The new law changes everything

Smart Irrigation. Real Smart.

- Save Water
- Save Money
- Irrigate up to 7 days per week

Just made law by Gov. Crist, SB494 creates new options for CDD's, HOA's, Water Authorities, managers, districts, and local governments throughout Florida.

By employing “**smart irrigation technology**” entire communities can receive a variance from irrigation restrictions. Better still, research shows that the addition of moisture sensors can **save up to 70 percent** of the water used for irrigation.

Landscapes get only the water they need and only when they need it. The result? **Great landscapes with less water and freedom from restrictions.**

Now **that** is **real smart irrigation.**

Our system features:

- Internet based monitoring and control
- Moisture sensors
- Precision lawn management
